Data Source: gisdspd.dbo.compstatdivmnd1_rcn, gisdspd.dbo.Part1LookUp
 Date Format: Date of Occurrence NC=Not Calculable, divide by zero error

7/16/2018 7:45:15 AM

Last years data is reconciled as of the date the report is executed.

Caution: Using percentages to express change between very small numbers is often misleading (such as, from 1 to 2 is +100%). The percent change from zero to a number is not calculable, and a percent change when there is zero difference is not meaningful. These statistics are preliminary counts of the original police incident reports and may vary from the final UCR (Uniform Crime Reporting) statistics published by the FBI. The above part I crime statistics listed are sometimes adjusted throughout the year due to re-classifications after being investigated or reports filed at a later date by a victim on a daily basis.

 Date Format: Date of Occurrence NC=Not Calculable, divide by zero error

7/16/2018 7:45:15 AM

Last years data is reconciled as of the date the report is executed.

Caution: Using percentages to express change between very small numbers is often misleading (such as, from 1 to 2 is +100%). The percent change from zero to a number is not calculable, and a percent change when there is zero difference is not meaningful. These statistics are preliminary counts of the original police incident reports and may vary from the final UCR (Uniform Crime Reporting) statistics published by the FBI. The above part I crime statistics listed are sometimes adjusted throughout the year due to re-classifications after being investigated or reports filed at a later date by a victim on a daily basis.
